Summary

Data Analytics Engineer with **3+ years** of work experience in building scalable data pipelines and analytics solutions on GCP/Azure/AWS. Expert in ETL workflows, dimensional modeling, predictive models, and executive dashboards. Combines engineering *(Python, SQL, Spark)* with analytics *(ML, A/B testing)* to transform complex data into actionable insights.

Education

MS in Data Analytics & Statistical Modelling | Northeastern University, Boston, MA | GPA 3.89/4.0 **Apr. 2025**

Bachelor of Engineering in Information Technology | University of Mumbai, India | GPA 3.70/4.0 **Jul. 2021**

Work Experience

Data Analyst Intern, IpserLab, Remote, United States **Jul. 2025 – Present**

- Built logistic regression models in **Python** on **AWS SageMaker** using **Redshift** to predict medication adherence from 500K+ patient records, achieving 85% accuracy and improving patient compliance by 34%.
- Created **QuickSight** dashboards with **AWS Comprehend** for patient sentiment analysis and **Athena queries** on claims data for anomaly detection, reducing manual review 70% and identifying $1.2M in fraudulent billing for health insurers.

Data Analytics Engineer, Cognizant Technology Solutions, India **Aug. 2021 – Aug. 2023**

- Supported migration of 200+ **Oracle/MySQL ETL jobs** to GCP ***(Dataproc, Dataflow, BigQuery)*** achieving sub-hour SLAs; built **PySpark** framework for **Salesforce/PostgreSQL/SQL Server** to BigQuery ingestion processing 100GB+ daily.
- Optimized BigQuery via clustering/partitioning/materialized views cutting query costs 45%; implemented **Google Data Catalog** governance and Python-based GCS archival managing 50TB+ historical data.
- Built **Power BI** dashboards analyzing 4TB claims with SQL/**DAX** *(YoY, cohort analysis, rolling averages)* reducing reporting from days to hours, developed SAS procedures for regulatory reporting enabling self-service analytics.
- Created **ML/Python predictive models** *(Random Forest, XGBoost)*, and **SAS** statistical models for patient risk accuracy; developed anomaly detection identifying $500K+ billing irregularities, influencing care strategies for high-risk members.
- Designed **HIPAA-compliant dbt marts** processing 10M+ records daily with automated testing; built **PHI de-identification/tokenization** enabling secure cross-team analytics with zero compliance violations.

Projects

Healthcare Revenue Cycle Management (RCM) Analytics Platform | GCP, BigQuery, Airflow, Looker **Oct. 2025**

- Built **end-to-end GCP** healthcare finance platform processing **EHR/EMR** claims and reimbursement data; implemented **BigQuery** medallion architecture *(Bronze→Silver→Gold)*, **star schema** for providers/payors/patients, **Cloud Composer**/PySpark ETL on **Dataproc** with **SCD2/partitioning** reducing processing; created **real-time** multilevel interactive **Looker** dashboards *(denial rates, AR days, collections)* with **CI/CD automation** reducing manual effort. [**GitHub**], [**Medium Article**]

FDA Drug Analytics Platform (Personal Project) | Python, SQL, Dash, ML Models, Render Cloud **Sept. 2025**

- Transformed **5M+ FDA drug records** into multilevel interactive dashboards revealing pharmaceutical market insights; discovered sponsor approval patterns using **ML clustering** that segmented 50,000+ companies into high/medium/low success tiers, enabling targeted marketing strategies; created prescriptive analytics that recommended optimal drug submission timing; deployed on **Render** for real-time pharma client access. [**GitHub**], [**Live Python based Dashboard**]

OTT Content Analytics Pipeline (Personal Project) | GCP, Python, Docker, Power BI **Aug. 2025**

- Built GCP pipeline *(Dataproc, Dataflow, BigQuery)* processing **21M+ IMDb records** with **real-time streaming**, developed Power BI dashboards using **PySpark/Beam** ETL for content recommendations through **dimensional modeling**. [**GitHub**]

Boston Public Health Commission (Master's Capstone Project) | Python, SQL, Power BI, Azure **Jan. – Mar 2025**

- Analyzed 4M+ touchpoints via **SQL** finding Twitter/peer tactics cut overdoses 42% (18-25); ML optimized $2.3M spend identifying 4-touch/month threshold; built **Azure pipeline** merging 47 datasets into Power BI for real-time zip analysis.

Skills

- **Languages:** Python, R, SQL, T-SQL, PySpark, DAX
- **Tools:** Apache Spark, Airflow, dbt, Kafka, Databricks, Docker, Git/GitHub, Power BI, Tableau, Looker, Cognos, Dash/Plotly
- **Platforms:** GCP, Azure, AWS, Snowflake, PostgreSQL, Google Analytics, Epic
- **Certifications:** IBM Data Engineering Professional, AZ-900, Google Data Analytics, Alteryx Designer Core, HIPAA, Epic

Leadership - Head of Marketing & Communications (*Volunteer*) | Boston New Technology **Dec. 2023 – Present**

- Develop marketing strategies for monthly networking events connecting 500+ tech professionals, managing social media presence, email newsletters, and sponsor communications to build Boston's startup community. [**Work Sample**]
